all previous Battletech development staff, be they with FASA, Fanpro, or Catalyst

Shugenja24, DougGlendower, & JimDeGris for supplying art to liven up the pages

Rage, Albatross, Alexander Knight, 3rdCrucisLancers, Jellico, Lore, Jeyar, Valendrigian,
Bergie, Hussar, Zone of Alienation, Liaofan, Kojak, Gracus, Rainbow 6, Granite, Thorne,

Lord Cameron, Istal Devalis, GreyWolfActual and anyone else on the
ClassicBattletech.com forums who contributed to the fact-checking or other myriad
advice, complaints, or suggestions which helped bring this project to life: I couldn't do it
without you.

INTRODUCTION

What you see before you is the culmination of one fan's passion for the game of Battletech. Back in 1992, FASA released the original *Objective Raids*. While riddled with errors & omissions, *Objective Raids* was a book of incredible scope with an inspired premise: provide players with all the background necessary to create raiding or snatch & grab scenarios. With the information included in that book, players could plot out raids to slow or stop enemy production of a certain 'Mech or other vehicle, or steal vital repair parts, and know right where they'd have to go, what forces would oppose them, and sometimes even the terrain of the target world.

Since that time, the number of BattleMechs, vehicles, weapons systems, & other pieces of equipment added to the game universe has exploded, but *Objective Raids* has never been updated as an official product. The reason why, looking at this newly created document, is obvious: a hardcopy book of this size would wind up with a high cover price and would be only marketable to only the most hardcore fan. Still, there have been many attempts over the years to replicate *Objective Raids* and update it to incorporate the numerous new materials released since the original. None have approached the scope of this book: *Objective Raids: 3067*.

In starting this project, it was my goal to create a version of *Objective Raids* which incorporated every unit in production in 3067, mere months before the opening volleys of the Word of Blake Jihad. Every TRO was scoured going back to the original TRO: 3025 and numerous sourcebooks were poured over and checked and rechecked. Rough copies were turned over to the dedicated fans at the CBT.com forums to tear apart and find errors to be corrected.

While every effort was made to be completely canon, there are a handful of BattleMech & vehicle designs and a preponderance of components with no canonical data regarding their manufacturer. Rather than leave these out, I chose to create a book which is complete in it's contents and thoroughly usable as the original was intended, and incorporated them into *Objective Raids: 3067*. I took into account a myriad of data before deciding on the most sensible, if non-canonically verified place of manufacture, and no canonical information was disregarded. In the case of completed battlefield units, I used such data as what company produced the original design and what sites produced vehicles using the same or compatible parts before assigning a production site. In the case of components, I looked into what sites were responsible for producing products of the same "brand name", whether or not they might be imported from other states, and where or not the factory of the completed vehicle typically produces the same type of component for their products or who was their typical supplier.

Thus, *Objective Raids 3067* could be described as quasi-canon. Whilst it does include non-canon information, nowhere does it contradict Battletech canon. Whilst thoroughly fact-checked, the possibility remains for the occasional error. If you locate what you believe to be an error in this book, please contact MadCapellan on the CBT forums by private message, and explain the error you think you have found. Please supply a CANON SOURCE, with page number, with information which contradicts what is found in *Objective Raids 3067*. A simple disagreement in opinion of where something should be produced is not an error. Errors will be corrected and new editions will be distributed.

I'd like to thank everyone for their interest in support of this project. It's been a wild but fun project.

William "MadCapellan" Gauthier
Objective Raids 3067 fan author and general lifeless nerd

A REPORT ON THE INNER SPHERE'S MILITARY-INDUSTRIAL SECTOR

Precentor Martial Steiner-Davion,

I'm glad we had plenty of lead time on this project, because it's taken me the better part of six weeks just to get this summary document completed! Although we set our goals high, I think we've outdone ourselves in the sheer amount of data gathered in this one report. Whilst our original goal was to simply track production capacity and output figures of major military manufacturers, Omega managed to track down not only individual component production numbers for these companies, but also of the companies which supplied their raw materials. Rho was also able to uncover a startling amount of data pertaining to this report, some of which I've taken the liberty of separating out on a separate datachip whilst omitting it from the distribution copies, lest it compromise the reporting agents. I figured you wouldn't want to have to root through table after table of rivet production figures and endo-steel fiber stress evaluations, so I've created this summary document to provide a brief overview of the Star League's Military-Industrial Output. It's hardly what I'd call light reading either, but it might at least be the type of thing you can look over in between preparations for the Conference.

-- Jessica Clarent
Precentor VI-Mu
Comstar Archives, Tukayyid
November 2, 3067

Your Celestial Wisdom,

Your Hands have been busy on New Earth. Huang Di Shi Zhe agents imbedded in Comstar's HPG station there have intercepted the transfer of a huge cache of data relating to Military-Industrial output Sphere wide. Indications are that Comstar planned to share it at the Whitting Conference to aid in planning of supply & logistics for further anti-Clan operations. Since Your Celestial Wisdom has opted to not attend this year, Director Ward thought you would desire to receive your copy in advance. Despite Omega-Tau-Sigma level encryption, our agents have managed to decode the accompanying protected files and Zang Shu Zhe Fratello teams Triela & Henrietta have dealt with our mole problem. Let me know if I or Citizen Ward may be of further service to Your Celestial Wisdom.

Zhong-Shao William Gauthier-Liao
November 27, 3067

MAP KEY

Maps appearing in this report display the locations of major military formations using a color coding system. Planets which are a solid color are guarded by a single military unit larger than Battalion, usually an Inner Sphere Regiment or Clan Cluster. Planets which are only partially shaded are guarded by a formation of Battalion size or smaller. Planets guarded by multiple formations are denoted by a series of color-coded circles or semi-circles adjacent to the planet.

 - designates a unit which is rated Elite

 - designates a unit which is rated Veteran

 - designates a unit which is rated Regular

 - designates a unit which is rated Green

Earthwerks STG II Endo Steel	Chassis	Stinger
LTV 120	Fusion Engine	Refits & Repairs
LTV 160	Fusion Engine	Locust
Chilton 360	Jump Jets	Duan Gung (Victoria)

Once a major player in military production throughout the Inner Sphere, the Succession Wars were cruel to Bergan Industries. By the end of the Succession Wars Bergan's plant on Ares was unable to produce anything larger than the smallest scout 'Mechs. Bergan's Corporate Executives have high-hopes that their recently acquired license to produce Earthwerks' STG-6L Stinger may help turn their company around. No longer needing to produce jump jets for their own products, the entirety of Bergan Industries' output of Chilton 360s are sold to Shengli Arms for use on their Duan Gung.

Another once prosperous manufacturer almost bankrupted by the Succession Wars, Hollis Incorporated produced such iconic Assault 'Mechs as the Battle Master & Highlander until a Marik raid during the 2nd Succession War destroyed much of the factory. Hollis Incorporated had only barely begun to recover and was about to begin production of their first new BattleMech design in well over three-hundred years when forces of the CCAF overran Corey during Operation Guerrero. Hardly surprised by the turn of events, Hollis' Board of Directors had remained loyal to the Celestial Throne ever since the 4th Succession War, paying lip service to the Archon-Prince only to take advantage of military subsidies Hollis Inc used to rebuild their facilities.

The untried members of the 3rd Battalion of the 4th Confederation Reserve Cavalry proved themselves during the fighting in the Fourth Succession War. The veteran forces of the Warrior House Regiment Fujita went off-world, and so the 4th Cavalry fought alone. When defeat was finally inescapable, they destroyed as much of the factories they were charged to protect as possible. Rather than allow them to fall into enemy hands.

The Federated Commonwealth's rebuilding efforts had barely begun when Styk was left to fend for itself in the Chaos March. Lyran troops withdrew to their own borders as Operation Guerrero ripped the Steiner-Davion empire in two. Despite Styk's initial intentions to remain independent, the realities of the Chaos March and the pressures of the Confederation government were such that before long Styk was once again a part of the Capellan state. The Confederation has further expanded the production capabilities of Tao 'Mechworks to include production lines for the Crusader, a 'Mech which has long been popular among Capellan military units.

Though once a massive manufacturing center, Earthwerks' factories on Tikonov have seen better days. Almost the entirety of the huge complex, including lines dedicated to the production of Thunderbolts, Thugs, Griffins, Stingers, and Bombardiers, were destroyed by Capellan troops during the 4th Succession War to prevent it from falling into enemy hands. The Federated Commonwealth did little to rebuild Earthwerks' facilities, content with the large number of effective Cataphracts which they supplied, and so it was left to the Corporation to rebuild the factory alone. Earthwerks believes that given time and enough capital, they could resurrect this once powerful production center, but the Confederation's tenuous grasp on the world and Davion blockades of the world have thus far put most of these plans on hold. This has not stopped them from resurrecting their ancient Koschei line for production of the venerable 'Mech for the export market.

ST.IVES

Days to Jump Point: 6

Defending Units: 1st St. Ives Lancers, SIMS Training Group

Corporations on St. Ives have expanded some the huge natural caverns found on the planet and housed their factories underground. This forces attackers to launch costly' Mech-to-Mech actions, but also has one small drawback. The extensive tunnel complexes have never been fully explored, and so a slim chance exists that an invader could enter a neighboring cave system and find a way to break into a plant at a lightly defended point.

Ceres Arms Warrior	ER PPC	Pillager, Warhammer
Ceres Arms Crusher	Plasma Rifle	Phoenix Hawk, Clint

The Ceres Metals plant on St.Ives has seen several significant changeovers in recent years. First was the conversion of it's 'Mech line from producing the Confederation's staple Vindicator to the BJ-3 Blackjack when the St.Ives Commonality broke away from the Confederation as the St.Ives Compact. Now following the reunification of St.Ives with the Capellan state, the line has been converted again, this time to produce different variants of Phoenix Hawk. Finally, continued demand for the BJ-3 design resulted in production of the venerable design being restored for limited runs.

Doombud	MML 5	Wasp (Sian)
Doombud	MML 9	Longbow

Demand for the GM 270 standard fusion engine increased dramatically with the design of recent variants of the Emperor, necessitating the construction of production lines for the engine on St.Ives & Menke. This has had the beneficial side effect of allowing Ceres Metals Industries to purchase the GM 270 engine directly from StarCorps. No longer reliant on shipments from the Taurian Concordant, CMI sees this as a godsend, what with the deteriorating relations between that nation and the Capellan state.

TENGO AEROSPACE

Raker IV	Medium Pulse Laser	Jingga, Yu Huang
Shengli	LB-20X	Yu Huang, Lao Hu
Shengli	ER PPC	Yu Huang

An old mothballed Star League Factory refurbished thanks to heavy investment from the Capellan State and the technical expertise of the Word of Blake, Shengli Arms has quickly become one of the largest manufacturing centers in the Confederation. Initially, technicians struggled to get all the applicable production lines online, and thus had to rely on imported equipment which was often of an inferior quality or sporadically acquired, neither of which was acceptable to a manufacturing concern. Production of ER Medium Lasers suffered so many setbacks that the Word of Blake had to completely rebuild the manufacturing line from the ground up using plans purchased from the Free Worlds League. With the new production line implemented and both StarCorps & Hellepoint 'Mechworks licensing the design for production at their plants as well, there is no longer a shortage of extended range Diverse Optics lasers in the Confederation.

OBJECTIVE RAIDS 3067 - CAPELLAN CONFEDERATION

Bical-6	SRM-6	Hatamoto-Chi, Lucifer II (Chatham), Behemoth (New Samarkand)

When it was first released, the Yori 'Mech Works Hatamoto-series was said to be built by Maltex Corporation in an effort to throw off MIIO attempts to locate the source of the then-new design. The components for the 'Mechs built here are manufactured at the Yori plant, located in the Al Na'ir system's asteroid belt, then shipped to Al Na'ir for final assembly.

OBJECTIVE RAIDS 3067 - DRACONIS COMBINE

Garret D5j	Targeting & Tracking System	JagerMech, Crusader & Nodachi (Vega)
Garret T11fc	Targeting & Tracking System	JagerMech III
Nashan Diana Mk.II	Targeting & Tracking System	Gunslinger
KBC Starlight Model QTA1	Targeting & Tracking System	Excalibur
ScatterGun	Machine Gun	Chimera

A large factory complex when first captured from the Federated Suns during the War of 3039, Independence Weaponry has been repeatedly selected to receive expanded DCMS military contracts over other factories with a longer history in the Combine and has grown in leaps and bounds, despite it's precarious position along the often tense border with the Federated Suns. This success is as much a result of the factory's position far out of reach of the invading Clans as it does with the quality of the products produced here.

SAFFEL

Days to Jump Point: **ERROR: DATA CORRUPTED**

Defending Units: None, 3rd Dieron Regulars, 10th Ghost, & 1st Kearny Highlanders within 1 Jump

ALSHAIN WEAPONS

Components Produced:

Name	Component	Typical Use
Lord's Light 2	ER PPC	Grand Dragon (Dieron & Yorii),

OBJECTIVE RAIDS 3067 - DRACONIS COMBINE

SHIMONITA

Days to Jump Point:

Defending Units: None, 16th Sun Zhang Cadre within 1 Jump

SAPPHIRE METALS

Vehicles Produced:

CGR-SA5 Charger

CGR-KMZ Charger

Components Produced:

Name	Component	Typical Use
Alshain Class 92	Chassis	Charger
Alshain Class 92A Endo Steel	Chassis	Charger
QuestStar	Improved Jump Jets	Charger
Boran Meta-Cygnus Plus	Communications System	Charger
Delta Track	Targeting & Tracking System	Charger

Once a small Luthien Armor Works production facility, this factory was recently purchased by the Sapphire Sunset Yakuza Oyabun. Renamed Sapphire Metals, work has begun on producing a pair of wildly altered Charger variants, which the Yakuza Clan hopes will find popularity within the Combine's Ghost regiments.

VEGA

Days to Jump Point: **ERROR: DATA CORRUPTED**

Defending Units: 11th Legion of Vega

COSBY BATTLEMECH & MYOMER RESEARCH FIRM

Vehicles Produced:

CRD-5K Crusader

NDA-1K Nodachi

NDA-2K Nodachi

NDA-2KO Nodachi

Inner Sphere Standard Battle Armor

Components Produced:

Name	Component	Typical Use
Foundation CMRFa6	Chassis	Crusader
Foundation CMRFa7	Chassis	Nodachi
Nissan 260 XL	Fusion Engine	Crusader

Originally a technology research firm dedicated to studying new Myomer applications, it's success with Triple-Strength Myomer and Battle Armor construction has catapulted into being a full-fledged military manufacturer, with a number of high-profile contracts with the DCMS.

YORII

Days to Jump Point: **ERROR: DATA CORRUPTED**

Defending Units: 3rd Night Stalkers (2 Battalions)

LUTHIEN ARMOR WORKS

Vehicles Produced:

DRG-7K Grand Dragon

Components Produced:

Name	Component	Typical Use
Alshain Type 56-60H	Chassis	Grand Dragon
Hermes 360 XL	Fusion Engine	Grand Dragon

OBJECTIVE RAIDS 3067 - DRACONIS COMBINE

BENJAMIN MILITARY DISTRICT

AIX-LA-CHAPELLE

Days to Jump Point: **ERROR: DATA CORRUPTED**

Defending Units: None, 6th Arkab Legion within 1 Jump

DIPLAN 'MECHYARDS

Vehicles Produced:

KBO-7A Kabuto

HM-1 Hitman

HM-2 Hitman

Components Produced:

Name	Component	Typical Use
Chariot Type 1a	Chassis	Kabuto
Chariot Type 1	Chassis	Hitman
Leenex 140 XL	Fusion Engine	Kabuto
GM 210 XL	Fusion Engine	Hitman
Argra 3L	Medium Laser	Hitman
Thunderstroke-L	LRM-5	Hitman

DOVER

Days to Jump Point: 9

Defending Units: None, 1st Proserpina Hussars & 6th Benjamin Regulars within 1 Jump

In addition to supporting two major weapons manufacturers, Dover is home to the Combine's People's Reconstruction Effort (PRE) Academy.

WAKAZASHI ENTERPRISES

Vehicles Produced:

SL-22 Sholagar

SL-15K Slayer

Components Produced:

Name	Component	Typical Use
Mangon Mark II	Frame	Sholagar
Wakazashi V	Frame	Slayer
RadCom TII	Targeting & Tracking System	Slayer

HINSDALE ELEC

Vehicles Produced:

Nagumo class Dropship

Condor class Dropship

Components Produced:

Name	Component	Typical Use
Pitban 1350-XRB	Interplanetary Drive	Condor & Nagumo

OBJECTIVE RAIDS 3067 - DRACONIS COMBINE

LAPIDA II “TEMATAGI MINOR”

Days to Jump Point: **ERROR: DATA CORRUPTED**

Defending Units: None, 1st Ghost Regiment within 1 jump

NIMAKACHI FUSION PRODUCTS LTD.

Vehicles Produced:

- SDR-7K Spider
- SDR-7K2 Spider
- SDR-9K Venom
- SDR-9KA Venom
- SDR-9KB Venom
- SDR-9KC Venom
- BSN-3K Bishamon
- BSN-4K Bishamon

Components Produced:

Name	Component	Typical Use
Crucis-II Delux Endo Steel	Chassis	Spider
Crucis-II Newhart Refit	Chassis	Venom
Crucis-II Delux Newhart Refit Endo Steel	Chassis	Venom
Fortune VII Endo Steel	Chassis	Bishamon
Magna 240 Light	Fusion Engine	Spider
VOX 280 XL	Fusion Engine	Venom
GM 315 XL	Fusion Engine	Bishamon
Rawlings 75	Jump Jets	Spider & Venom
Nimakachi Type 3	Armor	Bishamon
Omicron 4002 Networking Channel	Communications System	Spider & Venom
Omicron 5000	Communications System	Bishamon
Tronel XII	Medium Pulse Laser	Spider, Venom & Bishamon

Despite being one of the largest manufacturers of Light & Medium ‘Mechs in the Combine, Nimakachi is headquartered in the Free Worlds League. Its plant on Lapida II was in poor condition following the Succession Wars, leading to early runs of the Venom being imported in from the Free Worlds League until production lines could be repaired and upgraded locally.

MARDUK

Days to Jump Point: 6

Defending Units: None, 16th Benjamin Regulars within 1 Jump

VICTORY INDUSTRIES (Formerly Norse BattleMech Works)

Vehicles Produced:

- FS9-O Firestarter
- GRF-5K Griffin
- GRF-6CS Griffin
- GRF-6S Griffin
- WVR-8C Wolverine
- WVR-8K Wolverine
- WVR-9K Wolverine
- BHKU-O Black Hawk-KU
- AV1-O Avatar

OBJECTIVE RAIDS 3067 - DRACONIS COMBINE

Components Produced:

Name	Component	Typical Use
Foundation Reinforced Endo Steel	Chassis	Firestarter
Earthwerks GRF	Chassis	Griffin
Earthwerks GRF II Endo Steel	Chassis	Griffin
Crucis -A	Chassis	Wolverine
Crucis-A Endo Steel	Chassis	Wolverine
Alshain Type 52 Endo Steel	Chassis	Black Hawk-KU
Alshain Hagetaga-07	Chassis	Avatar
GM 275 Light	Fusion Engine	Griffin & Wolverine
Nissan 275 XL	Fusion Engine	Griffin & Wolverine, Lynx (Midway)
Hermes 280 XL	Fusion Engine	Avatar

Northrup Starlifters M50s	Jump Jets	Huntsman (Irece)
Northrup Super Heavy Starlifters A100s	Jump Jets	Supernova (Irece)
Northrup 12000	Jump Jets	Wolverine
Rawlings 40	Jump Jets	Chimera (Quentin)
Rawlings 55	Jump Jets	Griffin
Norse Industries 3S	Jump Jets	For Export
Norse Industries 7S	Jump Jets	Marauder (Quentin)
Mitchel Argon Standard	Armor	Black Hawk-KU
Starshield	Armor	Owens (Luthien), Grand Dragon (Luthien, Dieron & Yorii)
Starshield Ferro-Fibrous	Armor	Quickdraw & Daimyo (Luthien)
Starshield A	Armor	Griffin & Wolverine, Hitman & Kabuto (Aix-la-Chapelle), Daikyu (Luthien), Crusader & Nodachi (Vega)
Valiant Lamellor	Armor	Komodo (Luthien)
Neil 6000	Communications System	Griffin
Victory Throb	Small Pulse Laser	Wolverine
Victory 23R	Medium Laser	Wolf Trap, Komodo, Avatar, Jenner & Daimyo (Luthien), Manticore (Proserpina), Crusader (Vega), JagerMech III & Akuma (Quentin), Demolisher (New Samarkand)
Victory Heartbeat	Medium Pulse Laser	Wolverine, Charger (Luthien), Atlas (Al Na'ir & Quentin), Catapult, Hatamoto-Hi & Pegasus (Al Na'ir) Panther (New Samarkand) Hatchetman, Akuma, Marauder & Victor (Quentin), Crusader (Vega)
Victory Drumbeat	Large Pulse Laser	Wolverine, Nodachi (Vega), Marauder (Quentin)
Victory Nickel Alloy	ER Large Laser	Atlas (Al Na'ir & Quentin), Hatamoto-Mizo (Al Na'ir) Panther (New Samarkand), Daimyo (Luthien),

OBJECTIVE RAIDS 3067 - DRACONIS COMBINE

Telos DecaCluster	LRM-10	Akuma (Quentin) Inseki II Heavy Strike Fighter (Chatham), Riever (Altair)
Telos Scoreshot	LRM-20	Excalibur (Quentin)
Telos-4	SRM-4	Wolverine, Panther (Tok Do), Victor (Quentin), Bulldog (Proserpina), Nodachi (Vega), Jenner (Luthien)
Telos-6	SRM-6	Maxim (Al Na'ir)
Victory Xtralite Autogun	Light Machine Gun	Wolverine
Victory Array Assembly	Machine Gun Array	Wolverine
Victory	B-Pod	Wolverine

The extensive facilities once comprising Norse BattleMech Works are unquestionably the greatest prize the Dragon won in either the Fourth Succession War or the War of 3039. The complex was damaged very little during its capture and is still as self-sufficient as it was when under Davion control, with only the targeting and tracking computers imported from Luthien. Indeed, now that Victory has been granted the license to run the compound, they have greatly expanded the laser weaponry lines here, and they export many of the advanced components they produce.

PROSERPINA

Days to Jump Point: 4

Defending Units: 1st Sword of Light

BULLDOG ENTERPRISES

Vehicles Produced:

- Bulldog Tank
- Tokugawa Tank
- Manticore Tank
- Schiltron Tank

Components Produced:

Name	Component	Typical Use
Tamia 220	I.C.E.	Tokugawa
DAV 220	Fusion Engine	Tokugawa & Schiltron
Bulldog 240	I.C.E.	Bulldog
Bulldog	Armor	Bulldog & Manticore
Bulldog	Large Laser	Bulldog
Bulldog	Machine Gun	Bulldog, Maxim & APCs (Al Na'ir), Inseki II Heavy Strike Fighter (Chatham)
O/P R Janxiir	Communications System	Manticore
Xilex-2000	Targeting & Tracking System	Bulldog
TargiTrack 717	Targeting & Tracking System	Manticore, Tokugawa & Schiltron
Xilex-2000	Targeting & Tracking System	Bulldog

OBJECTIVE RAIDS 3067 - DRACONIS COMBINE

GUIDED TECHNOLOGIES

Components Produced:

Name	Component	Typical Use
Guided Technologies	SRM-2	Saracen, Scimitar, & Maxim (Al Na'ir) Behemoth (New Samarkand), Nodachi (Vega)
Guided Technologies 2 nd Generation	Streak SRM-2	Maxim & Saracen (Al Na'ir), Lynx (Midway), Marauder (Quentin)
Guided Technologies I NCK "Thornbush"	SRM-4	Scimitar & Maxim (Al Na'ir)
Guided Technologies 2 nd Generation	Streak SRM-4	Panther (New Samarkand), Grasshopper (Hun Ho), Pegasus (Al Na'ir), Manticore (Prosperina), Kabuto (Aix-la-Chapelle), Akuma (Quentin)

TOK DO

Days to Jump Point: 5

Defending Units: None, 6th Arkab Legion & 6th Benjamin Regulars within 1 Jump

ALSHAIN WEAPONS

Vehicles Produced:

PNT-10K Panther

Components Produced:

Name	Component	Typical Use
Alshain-560-Carrier Endo Steel	Chassis	Panther
Lord's Light 2	ER PPC	Panther, Grand Dragon, Daikyu & Daimyo (Luthien), Excalibur, Shugenja, Taisho, Tessen, Akuma & Naginata (Quentin), Griffin & Wolverine (Marduk), BattleMaster (Soul), Maelstrom & Lynx (Midway), Nodachi (Vega)
Lord's Light 3	Heavy PPC	Charger (Shimonita),
Lord's Light 4	Light PPC	Charger (Shimonita), Griffin (Marduk), Archer (Hun Ho), Sabre (Kervil)
Lord's Light 5	Snub-Nose PPC	Mauler (New Samrkand) Wolverine (Marduk)

Forced to relocate numerous times thanks to the Clan invasion, things seem to finally have stabilized for Alshain Weapons. Forced to destroy their factory on Jarett, they then had to quickly relocate their factory on Krenice to Tok Do. Now that things have calmed down, Alshain Weapons has reestablished production of their traditionally Combine 'Mech design.

OBJECTIVE RAIDS 3067 - DRACONIS COMBINE

Blankenburg	Medium Pulse Laser	Grasshopper & Cerberus (Hun Ho)
Magna Mk.III	Large Laser	Katana
Blankenburg	LB-10X	Katana
Holly-6	SRM-6	Katana

During Independence Weaponry's revamp of the old Blankenburg facility on Soul, they discovered that 90% of the parts used in the Katana were actually interchangeable with those of the BattleMaster. Not one to waste such an opportunity, Independence rushed to set up a second manufacturing line on Soul to produce the popular and venerable command 'Mech. When Blankenburg took back control of the facility in 3064, it was a simple matter for them to complete the upgrade and put the BattleMaster into production.

GALEDON MILITARY DISTRICT

HACHIMAN

Days to Jump Point: 7

When General Motors decided to expand their Kathil operations, rather than add their 'Mech plant onto the already existing factories, they chose to build a separate facility several hundred miles away in order to take advantage of newly discovered industrial ore deposits. The ore is long gone, however, and defenders must now guard two bases rather than one. Since that time, General Motors has greatly expanded their operations, to become one of the most important manufacturing facilities in the Federated Suns.

Just prior to the fall of the St. Ives Compact, HildCo Interplanetary licensed General Motors to manufacture the Pillager, as part of a comprehensive trade package between Duchess Liao and the then Federated Commonwealth. As BattleMechs previously exported were diverted to the SIMC, General Motors began producing the Pillager to compensate, and in exchange, HildCo was sold the rights to produce numerous components locally. Unfortunately, due to limited space for the additional line and the Capellan Confederation limiting the export of required components, production of the Pillager at Kathil is limited to a handful of units per year.

OBJECTIVE RAIDS 3067 - FEDERATED SUNS

NEW SYRTIS

Days to Jump Point: 4

Defending Units: 6th Syrtis Fusiliers RCT, New Syrtis CMM, remnants of the 4th Donegal Guards

New Syrtis holds an even more tempting prize than the Johnston Industries plant - the Regional Military Headquarters of the Capellan March. Whatever the target of would-be raiders, units attacking New Syrtis will find the planet's blizzards and extreme cold a foe nearly as potent as the 'Mechs stationed here

JOHNSTON INDUSTRIES

Poland Main Model C	Gauss Rifle	Rommel (Salem)
Johnston MiniGun	Machine Gun	Goblin, Cavalry (Ruchbah)
FarFire	LRM-10	Goblin & Fulcrum

Once a small-time ammunition manufacturer, in 3028 the Johnston family constructed this BattleMech construction facility on the well defended capital world of the Capellan March. Quickly, Johnston Industries became renown for their innovation, working hand in hand with the New Avalon Institute of Science and Defiance Industries to develop revolutionary new weapon designs.

Omicron 950	Medium Laser	Ripper
MainFire Minigun	Machine Gun	Ferret & Ripper

Cal-Boeing's current COE, Count Douglas Fassei, is a firm believer in the combat value of his VTOLs.

In a statement declaring that "Only one who has the utmost confidence in his product deserves the patronage of his customers," the count announced that he would no longer require the services of the AFFC- A battalion of his Wild Weasel and Marten VTOL's would henceforth defend his factories. As Belladonna is located deep within the Federated Suns, any raid here is highly unlikely. In fact, many skeptics believe the counts proclamation to be nothing more than a publicity stunt. It is clear that

the dainty defenders will not pose much of a threat to any aggressors reaching the planet.

Exostar	Large Laser	Hellcat (New Avalon), Eagle & Thunderbird (Axton)
Exostar	ER Large Laser	Corsair (Axton), Rakshasa & Maelstrom (Kathil), Longbow & Emperor (Crofton)

It is standard procedure for DropShip manufacturers to slap on whatever make of weapon is least expensive and/or most available. Dynamico's Delavan Shipyards is an obvious exception. Not only do they manufacture the energy weapons carried by the Avenger and Buccaneer DropShips produced here, but their laser systems are also shipped to other factories throughout the Federated Suns.

GULKANA

Days to Jump Point: 23

Defending Units: None, Point Barrow Academy Training Battalion within 1 Jump

When Christine Salos, Duchess of Gulkana, came into power twenty years ago, her planet was under the thumb of an insane dictator from the local militia. Only her father's indifference had prevented the AFFS from dealing with the rebels, as the situation fell under the duke's jurisdiction. Christine immediately gave the AFFS permission to move in, but requested more military contracts as a "reward" for her loyalty to the Davion government. Her line of Mydron autocannons are now in use on

AFFS 'Mechs and fighters, as well as the DropShips in which they were originally installed.

NEW AVALON

Days to Jump Point: 7

Defending Units: 1st Davion Guards, 2nd NAIS Cadre, & New Avalon Cavaliers, remnants of the 5th Donegal Guards & 10th Lyran Guards

New Avalon is heavily defended, but the units stationed here dilute their strength by covering no less than six major potential targets: Avalon City (including the Davion Royal Palace), the New Avalon Institute of Science, the Fox's Den (the Davion military headquarters) . Corean Enterprises (on the continent of Albion), the Achernar BattleMechs, and the Lycomb-Davion IntroTech factories (on the continent of Brunswick).

NEW VALENCIA

Days to Jump Point: 8

Defending Units: None, 4th Crucis Lancers RCT, Kestrel CrMM & Robinson DMM within 1 Jump

GM/Blackwell maintains an assembly plant for the feared Marauder II on New Valencia, but the planet is best known as a center for agriculture. The New Valencia Agriculture Company (NVAC) is a leading developer of sturdy hybrids of important grains. Indeed, the NVAC is said to be able to regulate test sites for the Marauder II in such a way that they completely avoid accidental destruction of their crops by the huge war machines.

SperryBrowning	Machine Gun	Watchman & Sentry

Politics have both hurt and helped Robinson Standard Battleworks throughout the years. Ostracized for centuries for being an upstart company owned by Duke Sandoval and being outside of the traditional "Old-Boys Network" of Military suppliers, RSB has been forced to purchase sub-standard components, and relies on imports from the Outworlds Alliance for advanced laser weapons. The tables turned during the FedCom Civil War, however, as desperate quartermasters would do next to anything to get a hold of Robinson Standard Battleworks increasingly sophisticated products. The Duke of Robinson used his influence to ensure that supplies were shipped only to those who would forward his personal goals, but even with these restrictions, RSB saw record profits.

OBJECTIVE RAIDS 3067 - FEDERATED SUNS

Precision Weaponry is the Federated Suns largest manufacturer of energy weapons systems, but it seems no matter how much they expand their facilities, they cannot sufficiently keep up with the ravenous hunger of the Federated Suns Military Industrial Complex for more lasers. Even with the opening of numerous production lines for advanced weapons designs licensed from Defiance Industries, many production centers are left with no choice but to import weapons from foreign sources, such as Diverse Optics in the Free Worlds League or Lushann in the Outworlds Alliance.

MAJOR IMPORTS

Capellan Confederation

HildCo Model 12 Jump Jets - For Valkyrie, Sentry, Axman, Watchman & Victor

HildCo Model 13 Jump Jets - For Pillager

OBJECTIVE RAIDS 3067 FREE WORLDS LEAGUE

OBJECTIVE RAIDS: 3067
THE FREE WORLDS LEAGUE

AMITY

Days to Jump Point: 3

Defending Units: 34th Marik Militia

The populace on the war-battered world of Amity supports the peace-loving Sir Charles Smith in Parliament. While Smith's so-called flower child belief in universal brotherhood has been ridiculed by other League politicians, his peace treaties with the Commonwealth worlds of Solaris and Rahne have preserved his constituents from the ravages of the Fourth Succession War and subsequent raids. Thus far, neither Captain General Marik nor Archon Steiner have found a prize on Amity valuable enough to justify breaking these well-publicized treaties.

IMSTAR AEROSPACE

Vehicles Produced:

Defender II Medium Strike Fighter

GM 250a	Fusion Engine	Cheetah
Imstar Aerolite	Armor	Cheetah
Starflash-I	Small Laser	Cheetah
Starflash-II	Medium Laser	Cheetah
Starflash	Medium Pulse Laser	Buccaneer (Gibson)

ANDURIEN

Days to Jump Point: 10

Defending Units: 1st & 9th Free Worlds Legionnaires

Though there have been no major uprisings since Andurien's unsuccessful bid for independence in 3030, a certain amount of civil unrest is constant in the Duchy. Enemies of the Free Worlds League will find vital military intelligence readily available here, along with other types of assistance. As a result, the regular units stationed here maintain a higher alert status.

OBJECTIVE RAIDS 3067 FREE WORLDS LEAGUE

ANDURIEN AEROTECH (A DIVISION OF FREE WORLDS DEFENSE INDUSTRIES)

Vehicles Produced:

F-92 Stingray

OBJECTIVE RAIDS 3067 FREE WORLDS LEAGUE

EARTHWERKS INCORPORATED

Vehicles Produced:

FLE-17 Flea

Components Produced:

Name	Component	Typical Use
Earthwerks Trooper II Endo Steel	Chassis	Flea
GM 120	Fusion Engine	Flea
Livingston Ceramics	Armor	Flea
Dalban Micronics	Communications System	Marauder (Gibson & Wallis)
Dalban HiRez	Targeting & Tracking System	Marauder (Gibson & Wallis)
Dalban HiRez-B	Targeting & Tracking System	Flea

ATREUS

Days to Jump Point: 16

Defending Units: 1st Knights of the Inner Sphere & 8th Free Worlds Legionnaires

Despite the fact that Atreus is home to more corporations under military contract than any other planet in the League, only a small percentage of the population is employed in these plants. The reason for this is simple: the companies based on Atreus are small (the largest, Imstar AeroSpace, produces only one design) and highly automated.

DELLER, BINGHAM, & FOUTS

Vehicles Produced:

Gazelle class Dropship

Hannibal class Dropship

Mammoth class Dropship

Components Produced:

Name	Component	Typical Use
Star League V95	Interplanetary Drive	Gazelle
Odysseus 491	Interplanetary Drive	Hannibal
Bally Tech Super X40	Interplanetary Drive	Mammoth

IMSTAR AEROSPACE

Vehicles Produced:

F-11 Cheetah

F-13 Cheetah

Components Produced:

Name	Component	Typical Use
Imstar 10/f	Chassis	Cheetah
GM 250 XL	Fusion Engine	Cheetah
Starflash	Medium Pulse Laser	Cheetah

IMPERATOR AUTOMATIC WEAPONRY

Components Produced:

Name	Component	Typical Use
Imperator Smoothie-2	AC/2	For Export
Imperator	Ultra AC/5	Hermes II (Irian)
Imperator Automatic	Ultra AC/10	Sirocco (Stewart)
Imperator Code Red	LB-10X	Hercules (Kendall & Kalidasa), Toyama (Gibson)
Imperator Zeta-a	AC/20	Riever (Andurien)
Imperator Automatic	Ultra AC/20	Riever (Andurien & Lopez)

OBJECTIVE RAIDS 3067 FREE WORLDS LEAGUE

Imperator	Light Gauss Rifle	Tempest, Hermes II, & Albatross (Irian), Grand Titan, Thunderbolt, BattleMaster & Griffin (Keystone), Emperor (Emris IV), Shadow Hawk (Calloway VI), Ostsol (Connaught), Rifleman (Thermopolis), Vulcan (Tematagi)
Imperator Type II Imperator Dragon's Fire	Light Gauss Rifle Gauss Rifle	Ontos (Shiro III), Main Gauche (Irian) Orion (Kalidasa & Kendall)

Previously a subdivision of Kallon Weaponry, Imperator has long been known for quality designs. During the Clan Invasion, thousands of Imperator's advanced weapons systems were exported throughout the Inner Sphere, allowing the company to develop an excellent business relationship with many corporations not just in the Free Worlds League, but beyond. Even now, they remain one of the top exporters of weapons systems from the Free Worlds League to other Houses, despite a backlog of orders substantially delaying shipments.

BERNARDO

Days to Jump Point: 2

Defending Units: 10th Marik Militia

KALLON INDUSTRIES

Vehicles Produced:

CRD-5M Crusader

Components Produced:

Name	Component	Typical Use
Crucis-B	Chassis	Crusader
Kallon FWL Special		
Light Ferro-Fibrous	Armor	for Export

EARTHWERKS INCORPORATED

Vehicles Produced:

FLE-17 Flea

Components Produced:

Name	Component	Typical Use
Earthwerks Trooper II Endo Steel	Chassis	Flea
GM 120	Fusion Engine	Flea
Livingston Ceramics	Armor	Flea
Dalban HiRez-B	Targeting & Tracking System	Flea

CALLOWAY VI

Days to Jump Point: 15

Defending Units: Earthwerks Security (2 Companies), Shelley's Stompers (1 Company),

Ducal Guard & 4th Brigade Fusiliers of Oriente, 2nd Oriente Hussars, & 5th & 9th Marik Militia within 1 Jump

A continuous flow of JumpShips visits this politically and militarily crucial, yet resource-poor world. In the past, raiders have often passed themselves off as traders, an easy feat in the constant confusion. Besides Earthwerks' factory complex, Calloway VI is also the location of the Duke of Oriente's winter retreat.

OBJECTIVE RAIDS 3067 FREE WORLDS LEAGUE

EARTHWERKS INCORPORATED

Vehicles Produced:

STG-5M Stinger
SHD-7M Shadow Hawk
ARC-8M Archer

Components Produced:

Name	Component	Typical Use
Earthwerks STG II Endo Steel	Chassis	Stinger
Earthwerks SHD II Endo Steel	Chassis	Shadow Hawk, Cronus (Talitha)
Earthwerks Archer II Endo Steel	Chassis	Archer
GM 120	Fusion Engine	Stinger
Hermes 275 XL	Fusion Engine	Shadow Hawk
VOX 280	Fusion Engine	Archer
Chilton 360	Jump Jets	Stinger, Shadow Hawk
Maximillian 100	Armor	Archer, Tempest (Irian)

Earthwerks has probably gained the largest benefits from the recent (post-invasion) increase in production in the Free Worlds League. The company has always been known for its quality products, and now that it has once again reached full production capacity, only the Irian and Gibson BattleMech corporations are more highly valued by the FWL military. Security is provided by the planetary garrison and Earthwerks security.

CAMPBELTON

Days to Jump Point: 9

Defending Units: None, 1st Knights of the Inner Sphere & 8th Free Worlds Legionnaires within 1 Jump

FUSIGON HEAVY WEAPONRY

Components Produced:

Name	Component	Typical Use
ChisComp 32	Small Laser	Griffin (Keystone)
Omicron 3000	Medium Laser	Stinger (Calloway VI)
Omicron 4000	Medium Laser	Quickdraw (Savannah & Shiro III)
Fusigon Mini	Light PPC	BattleMaster (Keystone)
Fusigon Smarttooth	Snub-Nose PPC	Cicada (Gibson), Gotha (Stewart)
Fusigon Longtooth	ER PPC	Griffin (Oliver), Warhammer (Wallis), Awesome (Savannah), Tarantula (Stewart), Falcon Hawk (Asuncion)
Fusigon Strongtooth	Heavy PPC	Wolverine (Thermopolis),
Fusigon Mark XI	ER PPC	Hercules (Kalidasa & Kendall), Cicada (Gibson)

Now the dominant partner in the merged Fusigon-Flametech Weapon Corporation, recent R&D efforts have resulted in the development of several breakthroughs in the field of Particle Projection technology.

OBJECTIVE RAIDS 3067 FREE WORLDS LEAGUE

CARBONIS

Days to Jump Point: 3

Defending Units: 9th Marik Militia

IMB SYSTEMS

Components Produced:

Name	Component	Typical Use
Dynatec 12B	Targeting & Tracking System	Eagle (Paradise)
Dynatec 150A	Targeting & Tracking System	For Export
Dynatec 990	Targeting & Tracking System	Stinger (Calloway VI)
Dynatec 1122	Targeting & Tracking System	Cicada, Hammer & Anvil (Gibson)
Dynatec 2180	Targeting & Tracking System	Quickdraw (Savannah & Shiro III), Chimera (Oliver)
Dynatec 2780	Targeting & Tracking System	Awesome (Savannah), Wraith (Paradise)
Dynatec MissileTrac X	Targeting & Tracking System	Yeoman (Paradise)
Octagon Tartrac System	Targeting & Tracking System	Phoenix Hawk (Keystone)
Octagon Tartrac System C	Targeting & Tracking System	Griffin (Keystone & Oliver), Longbow (Emris IV)
Octagon Tartrac System E	Targeting & Tracking System	Bloodhound (Keystone)
RCA Instatrak Mk.X	Targeting & Tracking System	Thunderbolt (Keystone)
RCA Instatrak Mk.XI	Targeting & Tracking System	Cronus (Talitha)
RCA Instatrak Mk.XII	Targeting & Tracking System	Shadow Hawk & Archer (Calloway VI)
RCA Instatrak Mk.XIII	Targeting & Tracking System	Buccaneer (Gibson)

IMB is a highly diversified firm, dealing mostly in civilian electronic packages such as vidcube viewers. Because IMB is a subsidiary of Irian Technologies, an Irian Security force of two lances of Wasp and Hermes II 'Mechs aids the Marik garrison in defending the plant. In addition to manufacturing products under its own label at the Irian plant, IMB bought the rights to manufacture the Dynatec, Octagon, and RCA product lines in the Free Worlds League.

OBJECTIVE RAIDS 3067 FREE WORLDS LEAGUE

CLIPPERTON

Days to Jump Point: 3
Defending Units: None

IRIAN TECHNOLOGIES

Vehicles Produced:

Leopard class Dropship
Leopard-CV class Dropship
Union class Dropship
Merlin class Dropship
Hamilcar class Dropship
Scout class Jumpship
Agamemnon class Heavy Cruiser

Components Produced:

Name	Component	Typical Use
Star League V84	Interplanetary Drive	Leopard
Star League V250-Lite	Interplanetary Drive	Merlin
Star League V250	Interplanetary Drive	Union
Star League V388	Interplanetary Drive	Hamilcar
K-F Mark IIb	Kearney-Fuchida Drive	Scout
Mycenae 35000	Kearney-Fuchida Drive	Agamemnon

It is not surprising that an affiliate of the League's largest 'Mech producer manufactures 'Mech carrying DropShips. What is surprising is that recently, the Clipperton Yard was substantially expanded to allow for the construction of the League's new *Agamemnon class* Heavy Cruisers. This product line makes Irian's orbital Clipperton factories tempting targets for enemy raiders.

CONNAUGHT

Days to Jump Point: 8
Defending Units: 18th Marik Militia & Romanov's Crusaders

KONG INTERSTELLAR CORPORATION

Vehicles Produced:

OTL-7M Ostsol
OTL-8M Ostsol
BL-6-KNT Black Knight

Components Produced:

Name	Component	Typical Use
Kell/H Improved Endo Steel	Chassis	Ostsol
Technicron 1L Endo Steel	Chassis	Black Knight
Hermes 300 XL	Fusion Engine	Ostsol
Hermes 360 XL	Fusion Engine	Ostsol

FLETCHER

Days to Jump Point: 9

Defending Units: 1st Marik Militia

FLAME TECH

Components Produced:

Name	Component	Typical Use
Flame Tech	Flamer	Stinger (Calloway VI), Vulcan (Tematagi)

When Thomas Marik ascended to the Captain-Generalcy, he discovered that Flame Tech (then manufacturing a variety of weapons at two facilities) had been pocketing government payments for weapons ordered by the Free Worlds Guards without delivering the goods. He cleaned house by disbanding the board of directors, selling the Campbellton laser plant to the Fusigon Corporation, and appointing loyal followers to the Fletcher complex. Unfortunately, the split led FlameTech to financial disaster, resulting in it being recently reemerging with Fusigon in order to avoid bankruptcy.

GIBSON

Days to Jump Point: 9

Durallex Heavy	Armor	Toyama
Maximillian 43	Armor	Stygian (Irian), Cronus (Talitha), Shadow Hawk (Calloway VI)
Maximillian 45	Armor	Grand Crusader

FWDI's version of the Northrup 12000 jump-jet system is a much-improved variant using the same basic design, but producing the parts with a superior casting process that results in a much stronger construction. This casting process is a closely guarded secret. Gibson Federated BattleMechs continues to be one of the main suppliers of BattleMechs to the Word of Blake Militia, despite that organization's return to Terra almost a decade ago.

BRIGADIER CORPORATION

Vehicles Produced:

Fury class Dropship
Buccaneer class Dropship
Merlin class Dropship
Monarch class Dropship

Components Produced:

Name	Component	Typical Use
Hyperdyne 211	Interplanetary Drive	Fury
Magna Corp. VX250B	Interplanetary Drive	Buccaneer
Star League V250-Lite	Interplanetary Drive	Merlin
Marly 750	Interplanetary Drive	Monarch

Brigadier's Gibson factory is actually a converted repair facility. The changeover from repair to production was a success, and the plant is running smoothly, however, defense is complicated by a landing field with only makeshift defenses at the site.

IRIAN

Days to Jump Point: 7

Defending Units: 7th Free Worlds Legionnaires & 13th Marik Militia

Though they have only been called upon to defend their world once (during the Second Succession War), the forces stationed on Irian tend to be overly proud of the fact that no enemy has ever taken the factories of this border world. This overconfidence could cost the league greatly when the planet is next invaded.

Octagon Missile Magnet	Narc Beacon	Trebuchet

One of the Inner Sphere's oldest and largest companies, Irian Technologies controls the entirety of the government, economy & workforce on the planet Irian, and has extensive influence with financial channels throughout the Inner Sphere. The Irian Mech factory is situated in the base of Soapstone Mountain, a location similar to the much larger Hesperus II facilities in the Federated Commonwealth. This attempt at fortification has not prevented its near destruction in the past, most recently at the hands of Anton Marik's rebels in 3014.

Despite a less diversified product catalog, Irian BattleMechs Unlimited rivals Defiance Industries of the Lyran Alliance for the title of Inner Sphere's most prolific weapons manufacturer, and its components can be found in almost every military unit across known space.

K-F Mark VIIIa-1	Kearney-Fuchida Drive	Star Lord

MACKENZIE

Days to Jump Point: 3

Defending Units: None

BRIGADIER CORPORATION

Vehicles Produced:

Behemoth class Dropship

Impavido class Destroyer

Components Produced:

Name	Component	Typical Use
Sunburst M-200L Megadrive	Interplanetary Drive	Behemoth
Fearless X-490K	Kearney-Fuchida Drive	Impavido

The Brigadier Corporation is one of three Inner Sphere factories still able to construct the gargantuan Behemoth class DropShip. Though incapable of atmospheric flight, the Behemoth is still a useful military tool because it can carry huge amounts of supplies from a jump point to a close planetary orbit.

MARIK

Days to Jump Point: 5

Defending Units: 5th Free Worlds Guards

This mined-out desert planet offers mostly symbolic reward to successful raiders, as its current value lies in its historical and emotional importance to the people of the Free Worlds League. Imstar AeroSpace also maintains a plant here. Captain General Marik's winter palace is also on Marik, and so any invader must take into account the presence of his personal guard. Marik's fierce summer dust storms can cloak a small force's approach, but they are accompanied by tornados strong enough to damage lighter 'Mechs and conventional vehicles.

IMSTAR AEROSPACE

Vehicles Produced:

InterComBust 120	I.C.E.	LRM Carrier
InterComBust 180	I.C.E.	SRM Carrier

ORIENTE

Days to Jump Point: 19

Defending Units: Ducal Guard & 4th Brigade, Fusiliers of Oriente, 2nd Oriente Hussars

Oriente has been raided so many times in the past that the citizens have become quite blasé about it. Invading Mechwarriors find none of the panic they are accustomed to causing, as the populace simply avoids trouble by using well-practiced civil defense procedures.

ORIENTE WEAPON WORKS

Components Produced:

Name	Component	Typical Use
Oriente Model O	LB-10X	Albatross (Irian)
Delta Dart	LRM-10	Quickdraw (Savannah & Shiro III), Griffin (Keystone)

CurtissJet 80	Jump Jets	for Export
CurtissComm Mk.I	Communications System	Wraith
CurtissComm Mk.II	Communications System	Eagle
CurtissComm Mk.IV	Communications System	Yeoman

A relatively recent move by Curtiss Hydroponics to further diversify their company, Curtiss Militech instantly gained a reputation for innovation with the release of their first BattleMech design, the TR1 Wraith. Further products released by Curtiss Militech have continued this trend of unorthodox design and clever ingenuity, and Curtiss' Military hardware has become a hit both with the LCCC and also with export markets.

REGULUS

Days to Jump Point: **ERROR: DATA CORRUPTED**

Technicron Type G	Chassis	Awesome
Magna 300	Fusion Engine	Quickdraw
Pitban 240	Fusion Engine	Awesome
Hermes 320 XL	Fusion Engine	Awesome
Chilton 460	Jump Jets	Quickdraw

Citizens of the Free Worlds League who support an expansion of the League's armaments industry are quick to point to the AWS-9M Awesome Mech, produced at both Irian and Savannah, as proof that maintaining the industry is worthwhile. The League produces a sprinkling of assault 'Mechs, but its production is in no way comparable to the production numbers of the Lyran Alliance. Marik assault lances are all too often filled with heavy 'Mechs such as the Warhammer & Marauder and while these designs are undeniably powerful, they are no match for the Alliance's Zeus and Atlas designs.

SHIRO III

Days to Jump Point: 15

Defending Units: None, 1st & 9th Free Worlds Legionnaires within 1 Jump

GILMOUR MILTECH

Vehicles Produced:

CNS-3M Cronus

CNS-5M Cronus

Components Produced:

Name	Component	Typical Use
Cipher ComSys 1-C	Communications System	Cronus

Once little more than a scrapyard, Gilmour Miltech has grown out of a BattleMech jury-rigging business into a full fledged 'Mech manufacturer. Whilst they once relied upon second hand parts salvaged from the scraps of classic 55 ton 'Mech chassis, Gilmour has grown to the point where they can purchase materials correctly, although they still only manufacture the Comm System for the Cronus BattleMech from scratch.

TAMARIND

Days to Jump Point: 5

Defending Units: Technicon Marine Guard (3rd Brigade Fusiliers of Oriente)

Once a battle-scarred world suffering in the throes of economic depression, Tamarind seems to have turned the corner. Under the tight-fisted but wise rule of Therese Marik, Tamarind has become a major exporter of both foodstuffs and valuable mineral deposits found across the planet's still pock-marked surface. In addition, there has been a major growth in industrial workers with the decision by the LCCC to make the Technicon Orbital Yards the location for the construction of the Free Worlds League's first Warship design. Once a little thought of border world, Tamarind is rapidly becoming well known for more than just it's local art.

Tek LOR T13d	Targeting & Tracking System	Exterminator

OBJECTIVE RAIDS 3067 FREE WORLDS LEAGUE

Considered to be a foreign company under League law, Kallon Industries has always had to fight an uphill battle to compete against the larger, local manufacturers. In order to improve their market potential, Kallon Industries has gone on a development blitz, upgrading their existing designs and reopening their maligned Exterminator line to produce a new variant for the Com Guards. Yet to have begun production, Kallon Industries has most recently developed what appears to be a deadly new version of their venerable Wolverine design. Having made only limited changes from the previous design, the new WVR-9M should be in full production within the next 6-8 months.

Gutierrez is the only small aerospace firm in the Free Worlds League, because government sponsorship of Imstar AeroSpace and Andurien AeroTech has driven out the rest of the competition. The company is owned and operated by Daniel Gutierrez, son of the famous aerospace pilot Colonel Maria Gutierrez. Profits have picked up recently, thanks to the release of the brand new Lancer aerospace fighter.

BOLAN PROVINCE

CHUKCHI III

Days to Jump Point : 7

Defending Units: None, Furillo BPM within 1 Jump

The aerospace weaponry produced by Maxell Metals may be essential to the defense of the Alliance, but the citizens of Chukchi III are far from pleased to be the ones supplying it . Their once-beautiful planet is becoming covered with the scabs of industrialization, and their once-peaceful cities are engulfed by crime. Local protesters have repeatedly damaged the planet's new factories; any raider who makes his way this deep into Commonwealth territory will no doubt find plenty of willing "inside help."

MAXELL METALS INCORPORATED (A DIVISION OF MAXELL)

Components Produced:

Name	Component	Typical Use
Maxell	Small Pulse Laser	Chippewa (Alarion & Wyatt)
Maxell	Medium Laser	Sabre & Centurion (Donegal), Eagle & Thunderbird (Gibbs), Hachiwara (Solaris VII), Champion (New Earth) Chippewa (Alarion & Wyatt)
Maxell	Medium Pulse Laser	Lucifer (Donegal)
Maxell	Large Pulse Laser	Chippewa (Alarion & Wyatt)
Maxell	ER Large Laser	Lucifer (Donegal), Night Hawk (Vendrell), Clint (Furillo)

FURILLO

Days to Jump Point: 5

Defending Units: Furillo BPM

DEFIANCE INDUSTRIES OF HESPERUS II

Vehicles Produced:

LCT-3S Locust
WSP-3S Wasp
ASN-30 Assassin
CLNT-5U Clint
UZL-2S Uziel
UZL-3S Uziel
SCP-12S Scorpion
AXM-3S Axman
STK-8S Stalker
Inner Sphere Standard Battle Armor

Components Produced:

Name	Component	Typical Use
Bergan VII Modified Endo Steel	Chassis	Locust
Irian Second Generation Class 20 Endo Steel	Chassis	Wasp
Maltex 40 Endo Steel	Chassis	Assassin
Andoran Model VI Endo Steel	Chassis	Clint
Foundation E50 Endo Steel	Chassis	Uziel
Defiance SLAM	Chassis	Scorpion
Dorwinion AXM Standard	Chassis	Axman

OBJECTIVE RAIDS 3067 LYRAN ALLIANCE

Titan H1	Chassis	Stalker
Rawlings 50	Jump Jets	Uziel & Clint
Rawlings 52	Jump Jets	Wasp & Assassin, Flashfire & Tsunami (Solaris VII)
Defiance B3S	Small Laser	Hunchback (Coventry)
Defiance B3M	Medium Laser	Locust
Defiance Model XII	ER Medium Laser	Wasp, Axman, Assassin, Clint, Stalker & Uziel
Defiance P5M	Medium Pulse Laser	Stalker, Hunchback & Vulcan (Coventry)
Defiance 1001	ER PPC	Stalker, Razorback & Marauder (Carlisle)
Zippo	Flamer	Flashfire (Solaris VII)
Defiance Shredder	LB-2X	Uziel
Defiance Shredder	LB-5X	Assassin
Defiance Shredder	LB-10X	Scorpion
Harvester 20K	SRM-6	Uziel & Scorpion, Pack Rat (Geinah & Carlisle)
Defiance Razorback ABA	B-Pod	BattleMaster (Storfors)

Defiance's factory here on Furillo is important to the LA military. Though not as crucial as the Hesperus II plant, the Lyran Alliance produces a preponderance of heavy vehicles, making the scout 'Mechs assembled here valued indeed.

GALLERY

Days to Jump Point : 3

Defending Units: None, 11th Arcturan Guards, 24th Lyran Guards, 1st & 2nd Royal Guards within 1 Jump

The world of Gallery presents a barren surface. The system's weak sun cannot penetrate the perpetual heavy cloud cover, and the planet is constantly swept by violent storms. The one attack ever made on Gallery, by the Free Worlds League, was a dismal failure. Visual scans are useless on the surface, and the chilling storms drastically reduce equipment's effectiveness. Would-be attackers who somehow avoid scattering on their drop or deployment must locate their objective on a terrain devoid of either natural or man-made landmarks, as Gallery's main industries are located far from its few squat cities.

The planet is honeycombed with long tunnels left by miningbots making extensive journeys for the rare pockets of gems and metals Gallery yields. The League raiders never exited the tunnels, most likely dying of starvation.

DYNAMICS

Components Produced:

HBK-5SS Hunchback

Components Produced:

Name	Component	Typical Use
Crucis Type V Endo Steel	Chassis	Hunchback
Omni 200 Light	Fusion Engine	Hunchback, Lightning (Tharkad)

Started as a joint venture between Norse-Storm and Coventry Metal Works to convert Hunchbacks to utilize the Alliance's new Defiance Disintegrator LB-20X autocannon, Norse Storm/Coventry Manufacturing has been upgraded to a fully functioning factory complex, able to produce limited numbers of brand new Hunchbacks. Norse Storm is currently attempting further negotiations to free up use of Stealth Armor supplied by Shengli Arms for use on a new Hunchback variant.

OBJECTIVE RAIDS 3067 LYRAN ALLIANCE

When Defiance Industries began work on a factory to produce its own fusion engines. Edasich Motors suddenly found a powerful reason to upgrade its facilities and product quality. By shutting down the Tentra plant, Edasich was able to use the machinery from that plant to upgrade the main factory on Edasich and construct a plant on Aur more quickly. It was undoubtedly the speed with which Edasich began production of advanced extra-light engines that convinced Defiance to continue to rely on Edasich Motors rather than expand their factory on Tharkad.

TharHes Maxi	SRM-6	Salamander, Banshee & Manticore (Hesperus II), BattleMaster (Storfors), Longshot (Solaris VII)

TharHes Industries is bound by a contract that has proved to be an embarrassment. When they began production of the WLF-2 Wolfhound, they entered into a long-term contract with Doering Electronics for Doering to provide them with the communications system carried by the Wolfhound. At the time, they were unaware that they would one day be a major manufacturer of communications units. Now the TharHes line of electronics is very popular, but it is not in use on their premier Mech!

Defiance Sting	Streak SRM-2	Manticore
Defiance Trak-Shot II	Streak SRM-4	Razorback (Carlisle)
Doombud	LRM-20	Salamander & Archer

OBJECTIVE RAIDS 3067 LYRAN ALLIANCE

Defiance Industries is the largest manufacturing firm in the Inner Sphere. The huge factory, rooted in the Myoo Mountains, pours forth BattleMechs, tanks, and the occasional Avenger assault ship, and is also a leading producer of lasers and cannons used throughout the Alliance.

DOERING ELECTRONICS

Components Produced:

Name	Component	Typical Use
Neil 6000	Communications System	Griffin, Colossus (Solaris VII)
Neil 6000a	Communications System	Hellcat (Tharkad), Thunderbird (Gibbs)
Neil 6000g	Communications System	Uziel & Scorpion (Furillo)
Neil 8000	Communications System	Thunderbolt
Neil 9000	Communications System	Archer, Berserker, & Demolisher II
Angst Clear Channel 3	Communications System	Banshee, Porcupine (Solaris VII)
Angst Clear Channel 3G	Communications System	Goliath
Angst Discom	Communications System	Atlas & Fafnir
Nashan Quartet ComSys	Communications System	Gunslinger
Scuti Dualcom	Communications System	Sentinel, Centipede (Gienah)
Angst Clear View 2A	Targeting & Tracking System	Banshee, Berserker & Demolisher II, Porcupine & Colossus (Solaris VII)
Angst Clear View Multitask	Targeting & Tracking System	Goliath
Angst Accuracy	Targeting & Tracking System	Atlas & Fafnir
Nashan Diana Mk.II	Targeting & Tracking System	Gunslinger
Scantrex DualTac	Targeting & Tracking System	Fortune
Sync Tracker (40-TC)	Targeting & Tracking System	Valkyrie & Sentinel
Doering Electronics Glowworm	Narc Missile Beacon	SRM Carrier (Richvale), Longshot (Solaris VII)

Despite the fact that the planet they call home has been raided fourteen times in its history, Doering Electronics itself has never been attacked, mainly because the nearby Defiance 'Mechworks overshadows this lesser prize. Their Neil line of communications units are shipped to other systems, but most of Doering's business is given to Defiance Industries.

NEW EARTH

Days to Jump Point: 6

While remaining more or less in operating condition, Lantren Corporation's factory on Bryant has been abandoned for centuries. Despite the desperate need for BattleMechs throughout the Succession Wars and into the current era, the world of Bryant's out of control ecosystem has forced Lantren to shut the plant down indefinitely. So long as no solution can be found for Bryant's global storms, Lantren's factory here seems destined to remain inoperative.

OBJECTIVE RAIDS 3067 TERRA & THE CHAOS MARCH

Springing up to provide a supply of rugged, flexible weapons platforms to the newly independent worlds of the Chaos March and beyond, Kressly Warworks isn't known for producing flashy designs. Mostly catering to independent worlds, second tier mercenaries, and local militias, Kressly Warworks has recently struck up a deal with Bander BattleMechs of Terra Firma to mass produce their Bandersnatch BattleMech.

Mitchell Systems	LRM-20	Imp
Larkin	SRM-4	Peregrine
Blackwell B75	Machine Gun	Kestrel & Peregrine

Once only a minor component supplier, association with the Wolf's Dragoons has led to incredible financial success for the once virtually unknown Blackwell Industries. Bound to the Dragoons by an exclusive contract when they first arrived on Outreach, Blackwell has since become a major military supplier to mercenary units across the Inner Sphere.

Imports:

Draconis Combine

Tiegart Maximum ER PPC - for Gallowglas

Federated Suns

Starguard II Armor - for Falcon

Valiant Lamellor Armor - for Gallowglas & Marauder II

Mydron Excel LB-10X – for Annihilator

Free Worlds League

Magna Mk.IV ER Small Laser - for Imp

Magna 400P Medium Pulse Laser - for Falcon, Annihilator & Imp

Diverse Optics ER Medium Laser - for Marauder II

Magna Mk.VI ER Medium Laser - for Falcon, Gallowglas, War Dog & Imp

Word of Blake
Martell Small Pulse Laser - for War Dog
Martell Medium Pulse Laser - for War Dog
Blankenburg Large Pulse Laser - for War Dog

SOL SYSTEM

Days to Jump Point: 9

The Cradle of Civilization, the Sol System is home to Terra, the homeworld of Mankind, as well as a number of other inhabited planets & moons. Unfortunately, since 3058, the entirety of the Sol System has come under the control of our wayward brethren in the Word of Blake. ROM indicates that since seizing control, the Word has kicked weapon manufacturing into overdrive, re-opening numerous military-industrial complexes which have remained dormant since the fall of the Star League. Using existing data about the mothballed manufacturing lines, and comparing it against the steady stream of incoming intel, this article represents the most accurate picture as to the massive industrial capacity now in the hands of our extremist expatriates.

Despite restoring numerous old, nearly forgotten factories to life, Our Blessed Order has been unable to uncover *where* all of these weapons are going. It is known that some are being supplied to the Word's allies and puppets in the Chaos March and Periphery, under the auspices of providing for the security of the underprivileged, but evidence indicates this is but a small trickle of the stream of BattleMechs, tanks, small arms and other military equipment streaming out of Terra. It has been hypothesized that the Word of Blake may be in the process of building up one or more secret Divisions, a frightening possibility indeed. Thankfully, this remains simply idle speculation at this point in time. With the incredible intelligence gathering capabilities of Our Blessed Order, it would be virtually unthinkable that an entire Division of troops could be formed without leaving a single trace of evidence, let alone multiple ones. Such an effort would make the deceptions performed by Wolfnet during the early 31st century seem like cheap parlor tricks. It is far more likely that these arms are being stockpiled at some as of yet unknown location, or that they are being supplied to an as of yet unidentified buyer.

TITAN

Defending Units: Elements of the Word of Blake Fleet

TITAN SHIPYARDS

Vehicles Produced:

Assault Triumph class Dropship
Suffren class Destroyer
Dante class Frigate

Components Produced:

Name	Component	Typical Use
CS Kilo-Theta	Interplanetary Drive	Triumph
Fleur de Lis 90k	Kearney-Fuchida Drive	Suffren
Alpha-Omega 7625	Kearney-Fuchida Drive	Dante

The massive Titan Shipyards are a relic of the Star League, but their advanced age should not mislead one to believe them decrepit. On the contrary, the shipyards at Titan have been undergoing major renovations. For now, they are being used to refit numerous dropships and jumpships purchased throughout the Inner Sphere by the Word of Blake, but they are more than capable of producing even larger and more powerful Warships than the Destroyers and Frigates already being constructed there.

Imports:

Draconis Combine

Shigunga MRM-40 - for Ahab

Free Worlds League

Irian Weapon Works Super 6 Medium Laser - for Initiate

Fusigon Smarttooth Snub-nose PPC - for Shadow Hawk & Ostroc

Fusigon Longtooth ER PPC - for Gurkha

Fusigon Strongtooth Heavy PPC - for Ahab

Imperator Code Red LB-10X - for Hammerhead

Imperator Automatic Ultra AC/20 - for Hammerhead

Corean Light Gauss Rifle - for Vanquisher

Burow Anti-Missile System - for Padilla

Irian Weapon Works V7 LRM-15 - for Initiate

Hovertec Streak SRM-2 - for King Crab, Blue Flame & Zephyr

Guided Technologies 2nd Generation Streak SRM-4 - for Legacy

Guided Technologies 2nd Generation Streak SRM-6 - for Grand Crusader II

Irian Weapon Works 60mm SRM-6 - for Initiate

Garret D2j Targeting & Tracking System - for Shadow Hawk

Kallon FWL Special Light Ferro-Fibrous Armor - for Shadow Hawk

CurtissJet 80 Jump Jets - for Grand Crusader II & Legacy

Vlar 300 Light - for Bandersnatch

OBJECTIVE RAIDS: 3067 **THE CLAN HOMEWORLDS**

Almost two decades ago, the source of the Clans incredible battlefield technology was a mystery, more so than even they themselves. Over the past years, we have gathered an incredible volume of information on the Clans in our attempts to defeat them and put an end to their invasion of the Inner Sphere. Following Operations Bulldog and Serpant, the SLDF has even established an enclave deep within Clan Space, and obliterated an entire Clan. Despite all of our amazing gains in the past years, however, many things about the Clans remain a mystery. Whilst we have been able to gather a large amount of data about the Clans' manufacturing capacity, much remains unknown.

Sensibly unwilling to be forthright with information regarding their military capabilities, what little we know of Clan Industry comes from what has been made public knowledge, hearsay, or uncovered through the dangerous and difficult work of our intelligence operatives. What we learned was that the Clans' manufacturing process is far more complex and decentralized than that found in the Inner Sphere. Most every world in the Kerensky Cluster is home to at least one small armament manufacturing facility supplying the fighting forces there with replacement parts, weapons pods, ammunition, and armor plating, and even their main manufacturing centers are operated more in the fashion of an artisan's workshop than an assembly line. Whilst this does limit their manufacturing output somewhat, it allows for an incredible flexibility in the manufacturing process, where a line producing a Heavy BattleMech one day may suddenly be constructing hovercraft in only a few short weeks. Experts have theorized that the reason behind such a system is the Clans culture of constant, low intensity warfare guarantees that industrial centers will be won and lost with relative frequency, requiring them to be adaptable to the materials available.

That being said, despite our best attempts at creating an all encompassing document, what is available is far short of a complete index of the Clans' industrial complex. Rather than leave this information out of the report, however, I felt that the information we have managed to gather over the years was of such value that not including it would be depriving those using this report of vital information necessary to our efforts to triumph over the Clans, and would be an injustice to the brave men and women who placed their own lives in peril to gather this data. Thus, I have strived to provide the most complete picture we have of the Clans' military factories and production facilities. Data provided in *italics* is speculative data based on the best intel provided by our agents in the field. Rather than list dozens upon dozens of small workshops, we also choose to limit our report to only those sites producing finished combat vehicles, omitting what would've been a hundred pages of small local facilities that have limited production capacity, such as one which turns out eight to ten small pulse lasers annually.

Remer Series Beta	ATM-3	Horned Owl

No evidence of Warhawks being manufactured at the small and well hidden Abysmal Manufacturing Complex have so far been substantiated. Long a little used and poorly maintained production plant of the now destroyed Smoke Jaguars, for decades it has only produced a handful of lighter 'Mechs for recon and garrison work, duties the Clans find disdainful. Still, rumors continue to propagate that ever since capturing the facility from the Smoke Jaguars, the numbers of Warhawks in the Goliath Scorpion tuman has grown exponentially.

OBJECTIVE RAIDS 3067 CLAN SPACE

Since taking control of the lion's share of the Free Rasalhague Republic, Clan Ghost Bear has done their utmost to integrate as much as possible with the occupied populace. Although such factories as Gorton, Kingsley & Thorpe's on Satalice might seem of dubious value to the Clan's touman, Clan Ghost Bear continues to train the workers here and hope to be able to have them trained to manufacture up to Clan standards soon. Until then, they continue to accept modest numbers of the factory's original products for use as training 'Mechs and to be issued to the lowest of garrison & solahma troops.

OBJECTIVE RAIDS 3067 MAGISTRACY OF CANOPUS

For centuries, Majesty Metals & Manufacturing of Dunianshire was the dominant arms manufacturer of the Magistracy, but since the opening of several Trinity Alliance funded factories on the newly colonized world of Detroit, it has slid into a position of begrudging second-place. Eager to return to the limelight, MM&M has just begun work on constructing a new Heavy BattleMech line to produce the venerable Capellan Koschei 'Mech design, obtained under license from Earthwerks Incorporated.

PRAXTON

Days to Jump Point: 3

Defending Units: None, 1st & 5th Alliance Air Wing, Avellar Guard & Alliance Grenadiers within 1 Jump

Praxton is the only industrialized planet in the Outworlds not located near the center of Alliance space. The value of the fusion engines built here and the short transit time from the system's jump point make Praxton a prime target for Periphery raiders. The standing orders of the units stationed here forbid the troops to go to the aid of nearby worlds under attack. Pirates in the area try to decoy the defenders of the Praxton factories away with diversionary raids on the neighboring worlds, but the power plants produced by Praxton Fusion are simply too valuable to endanger .

Harvester 20K	SRM-6	Plainsman (Pinard), Chippewa (New Vandenburg)

The Pinard Protectorate facilities on this water-world consist of three separate factories on miniature islands. The defenders here must use large, vulnerable air and sea transports to move reinforcements between factories, because traveling along the sea bottom by 'Mech is too slow to be practical for the distances involved. A fourth facility, once a part of PP Ltd, has resumed independent operations as the Taurian branch of Alphard Trading Corporation.

ALPHARD TRADING CORPORATION (Formerly a Division of Pinard Protectorates Ltd.)

STEROPE

Days to Jump Point : 5

Defending Units: None, 2nd Taurian Lancers within 1 Jump

Throughout the Concordat's history. Home Guard regiments raised by the nobility of Sterope have manned the many reinforced static gun emplacements that guard the planet's industries. These units have always held off attackers long enough for reinforcements to arrive, and so the Protector sees no reason to station 'Mech and armor units on the planet. Many in the Taurian Defense Force feel it is only a matter of time before the Noble Family regiments run out of luck .

TAURUS TERRITORIAL INDUSTRIES

Vehicles Produced:

SYD-Z1 Seydlitz
SYD-Z3A Seydlitz
Maultier Hover APC
Hunter Tank

Durallex Medium	Armor	Hatchetman, Shadow Hawk (Illiushin)
Durallex Medium Ferro-Fibrous	Armor	Marshal, Ostroc (New Vandenburg)

Taurus Territorial Industries is the largest of all Taurian weapons manufacturers, and its fanatical defenders are well aware of the firm's importance to the Concordat. Unfortunately, not even they could prevent the Fighting Urukhai from damaging the facility and completely destroying the factory's Hatchetman line. The entire factory complex remains unoperational at this time, awaiting crucial repairs to the building's structure.

Death Blossom	Rocket Launcher-20	Marauder II

When the Taurians cut off relations with the Marian Hegemony, in desperation, Caesar Julius O'Reilly contacted the Word of Blake in hope that they could supply them with the components they needed to continue production of the Gladius Hovertank. The Word of Blake supplied all that and more, and now Marian Arms is refitting second-hand Whitworths & JagerMechs and is capable of full-blown construction of Light BattleMechs! While an incredible achievement in such a short span of time, Marian Arms is still heavily dependant on Word technical assistance and the importation of key components from Terra, a situation our wayward brothers have no intention of altering. Perhaps most surprising, Marian Arms is manufacturing their own Marauder II variant around stolen chassis. While they are currently incapable of actually manufacturing the required components, they are strung along by assurances that the Word of Blake will assist them in being able to begin actual production.

A hidden factory has been constructed deep in the mountains of Baltazar III. While ROM has yet to pierce the veil of secrecy surrounding this facility, external observation has yielded a detailed picture of the facilities production capabilities. Just like in the Marian Hegemony, the Acolytes & Adepts of the Word of Blake are everywhere, working with the more complex components and supervising Circinian personnel. What the Word of Blake is up to is anybody's guess. By their interference, they tipped the balance during the Marian invasion enough to bring it to a screeching halt. What are their goals in all of this? What can be gained by supplying their knowledge to the Capellans, Marians, & Circinians? Does this not violate the same principles of non-interference laid down by Toyama, whom they venerate? I pray in the name of the Blessed Blake that I am wrong, but I believe that our wayward brethren have become twisted into something far more sinister than we even imagine, and I dread the day that we discover what they have become.

Relying almost entirely on parts stolen or acquired from outside the Haven Cluster, Vengeance Incorporated is little more than a new manufacturing arm of Lady Death's notorious pirate band. That they have begun cobbling 'Mechs together at all is a frightening discovery.

OBJECTIVE RAIDS 3067 PRODUCT INDEX

PRODUCT INDEX

This section provides a quick reference to military products manufactured in the Inner Sphere and Clan-held territories. It will prove useful for predicting where raids will occur based on what can cause shortages in required technology. The products are listed in alphabetical order by type of product and component. Each item is also identified by where it is manufactured and who holds the planet. The following abbreviations are used throughout:

CC: Capellan Confederation
CF: Circinus Federation
DC: Draconis Combine
DS: Clan Diamond Shark
FRR: Free Rasalhague Republic
FS: Federated Suns
FWL: Free Worlds League
GB: Clan Ghost Bear
JF: Clan Jade Falcon
LA: Lyran Alliance
MH: Marian Hegemony
MoC: Magistracy of Canopus
NC: Clan Nova Cat
OA: Outworlds Alliance
TC: Taurian Concordat
W: Clan Wolf
WiE: Clan Wolf in Exile
