#### **Special Thanks To:**

Bryan for letting me write this book (only took five years of pestering) for keeping me on the right track and for his patience when I overran.

Randall and Flake for producing all the variant designs.

The RGM crew (too many to mention individually) for their suggestions and advice.

My colleagues at TRBI for attempting to give me a life away from a word processor (even if I had to turn down the dinner invites, sorry Claire).

And as always, the gaming gang (Neil, Daren, Mike and Simon) for advice on rules and technical matters. Enjoy the land of sheep and penguins, D.

#### **Authors Dedication:**

To the new generation of gamers:

Arthur Merriman and Alexander Moss

### Special Thanks

In addition to the playtest crew (who came up with many fine suggestions and refinements) and those who helped out with HeavyMetal Aero, I'd like to thank everyone—sorry, you're too numerous to mention individually—who contributed to this project by suggesting corrections, either on the Classic BattleTech forums or via e-mail. I wasn't able to include everything but hopefully most of the bases have been covered.

Details on HeavyMetal Aero can be found at <http://www.heavymetalpro.com>.

To the usual proofing crowd: Rich Cencarik, Peter La Casse, Jeff Morgan, Max Prohaska, Ben Rome, Øystein Tvedten, Christopher K. Searls, Paul Sjardijn.

To Drew Williams, who once again came through under amazing deadlines to provide the fantastic painted miniatures that comprise the color section of this book; you get the Order of the Star for helping to advance BattleTech in all its forms. Thanks for coming through and making my last minute idea into reality.

To Iron Wind Metals (especially Mike Noe), who puts up with my constant demands on their and Drew's time, and of course for being so receptive to the idea of starting up an AeroTech 2 line of miniatures in the first place.
